

Endodontics 273 Materials List

- 1) Micromotor + Micromotor Handpiece
- 2) Contra-angle Handpiece
- 3) Diamond burs for contra-angle handpieces in various sizes and shapes
 - Round burs in various diameters (010–012) for the micromotor (minimum 2 of each), with black and green bands.

- Fissure burs in various diameters (010–012) for the micromotor (minimum 2 of each), with black and green bands.

- 4) Root canal files (box of 6): size 15, white; the K-file.

- 5) K-file set: sizes 15–40 and sizes 40–90.

6) Box of gutta-percha points (sizes 15–40)

7) Box of paper points (sizes 15–40)

8) Gates–Glidden set

9) Caries-free extracted human teeth:

- At least 10 maxillary incisors
- At least 10 mandibular incisors
- At least 10 canines
- At least 10 maxillary premolars
- At least 10 mandibular premolars
- At least 10 maxillary molars
- At least 10 mandibular molars

If extracted teeth cannot be obtained, specially manufactured plastic teeth with root canal anatomy may be used in the specified quantities for endodontic exercises. Preferably EDUDENT brand, with opaque crowns.
